Alumni News

In as much as this is the first news letter to come out of the Entomology Department for a few years this part of our letter is necessarily blank as we have been out of touch and don't know what you are up to. We hope to remedy this void with the reestablishment of a yearly newsletter. But in order to do this we are going to need your cooperation.

In future newsletters we would like to include news from our previous graduates. To contact you individually on a yearly basis would be quite impossible so we are asking for your help.

The last page of the present newsletter is an information sheet which we would like you to remove, fill out and return to us. We are going to establish the policy of including only those in the newsletter who have responded to the information form. With this help from you the newsletter will be more meaningful each year and your colleagues will have an opportunity to keep track of your activities.

As mentioned in our opening remarks the facilities of the Department have been greatly enhanced in the past few years. In addition to new buildings and research instrumentation there are ample funds available for graduate students in the form of Traineeships, National Defense Graduate Fellowships and Research Assistantships. So we would be most grateful for any really good students which you may send to us.

In conclusion we send greetings to our alumni and friends outside the University of Illinois and we welcome any questions or comments you may have.
